Accuray Recognized for Outstanding Business Achievements

Armanino Consulting Client Earns Microsoft Dynamics® Industry Excellence Award

Sunnyvale, Calif. — March 20, 2012— Armanino Consulting is proud to announce that its customer **Accuray Incorporated** (Nasdaq: ARAY) was recognized by Microsoft® with the 2012 Industry Excellence Award as part of the Microsoft Dynamics Customer Excellence Awards program. They will be honored by Microsoft executives at an awards luncheon on Monday, March 19, 2012 at Convergence 2012 Houston, the premier Microsoft Dynamics user conference.

The 2012 Customer Excellence Awards, which are presented in 9 categories, recognize and celebrate Microsoft Dynamics customers that have achieved notable accomplishments using their Microsoft Dynamics solutions.

Accuray was recognized for its strong commitment to **Industry Excellence**. Working with Microsoft Dynamics Gold ERP certified partner, **Armanino Consulting** of **San Ramon, Calif.**, **Accuray:**

- Improved operations to support business growth;
- Consolidated more than 18 disparate IT systems into a single integrated Dynamics AX platform; and
- Created a paperless environment for the regulated components of its manufacturing and service business lines.

“Microsoft Dynamics AX has given our company great sales and service support, both internally and for our customers,” said Arul Daniel, Director of Enterprise Applications for Accuray.

Established in 1997, the Customer Excellence Awards are awarded each year at the Convergence user conference in the United States. Microsoft Dynamics partners and team members submit nominations. Judging teams for each of the categories rated nominations on category specific criteria. Proposed winners for each category were then presented and reviewed by a panel of Microsoft executive judges for final approval. As part of that final review, winning customers were chosen.

Microsoft Dynamics is a line of financial, customer relationship and supply chain management solutions that help businesses work more effectively.
